The ELECTRI International Innovation Summit Paris

Hosted by **Schneider Electric**

Imagine your company's future as you experience amazing innovations during the extraordinary **ELECTRI International Innovation Summit** hosted by Schneider Electric.

Join ELECTRI International in Paris from April 4-9, 2022 to:

- Tour Schneider's cutting-edge Innovation Hub.
- Discover ways to maximize project efficiency as our European colleagues are learning to do.
- Meet with French contractors and manufacturers who belong to **Gimelec**, an organization similar to ELECTRI.
- Visit a French electrical contractor's high-tech job site.

Here's what some of our ELECTRI International leaders have discovered:

Sonja Rheume, President of Christenson Electric and past ELECTRI Council Chair, visited the **Schneider Electric Innovation Hub Paris** where she saw many innovations that have enabled European electrical contractors to forge ahead of our US EC industry, including digitization and smart building systems.

James MacDonald, Miller Electric's representative to the ELECTRI Council,

also visited the Innovation Hub. He is convinced the adaptation of new technologies can make electrical contractors in the US more successful.

Schneider Electric explained the opportunity this way: *"ELECTRI's Innovation Summit is for forward-thinking electrical contractors who want to focus on innovation, project life cycle, and ways the Europeans design their industry standards."*

About the Pullman Paris Tour Eiffel
